## DAITSU PORTABLE

APD-12CK

### Specific benefits

#### TURBO

Increase the cooling or heating power to accelerate the air conditioning of the room and get the desired temperature quickly.

#### SWING

The air outlet louvers move vertically automatically to distribute air homogeneously.

#### DEHUMIDIFICATION

Reduces humidity in the room.

#### TIMER

It allows a complete programming during 24 h.

#### LIGHT

Function that allows all the light indicators of the indoor unit to turn off.

#### SLEEP

It regulates the temperature level of the room to obtain maximum comfort and energy savings.

#### FOUR AIR CONDITIONING SPEEDS

**HIGH** : For optimum dehumidification.  
**MEDIUM** : For normal operation.  
**LOW** : For silent operation.  
**AUTO** : The equipment selects the appropriate speed at each moment.  
**VENTILATION** : Operation option in fan mode.

POWER	3000W
Application Area	22m <sup>2</sup>
Dehumidification	1.2 l/h
Sound Level	51 db (A)
Air Volume	370m <sup>3</sup> /h
Voltage	230/1/50Hz
Refrigerant	R410A
Weight	33.5Kg
Width	390mm
Height	820mm
Depth	405mm
