

## Advanced Notification of Price Increase from 1st February 2019 on Mitsubishi Electric Air Conditioning.

### Statement from:

### Mitsubishi Electric

As you will be aware, market conditions continue to challenge all of us in the industry and manufacturers in particular.

As such, Mitsubishi are in the unavoidable position of having to implement a further product price increase.

Due to the latest stage of the F-Gas phase down and the resultant difficulty to procure core refrigerants at historical prices, and the continued trend of increases in raw materials, product production costs have increased.

We do not under-estimate the effect that changes can have on your business and being a valued customer, we have sought to provide you with as much advanced notification as possible and have also endeavored to keep any increases to a minimum.

All increases referred to herein, will come into effect on the 1<sup>st</sup> February 2019

- **3% increase:** R32 M Series, R32 Mr Slim, City Multi R32 & R410a VRF and Accessories
- **3% increase:** Ecodan and Accessories
- **4% increase:** Lossnay ventilation, accessories
- **5% increase:** R410a M-Series, Mr Slim outdoor & accessories, all spare parts
